

Tobacco Control Research Branch Information and Resources

The National Cancer Institute's Tobacco Control Research Branch (TCRB) leads and collaborates on research and disseminates evidence-based findings to prevent, treat, and control tobacco use. Visit the TCRB website for information on TCRB key initiatives, funding opportunities, and tobacco control resources and research tools.

TCRB Resources

Tobacco Control Monograph Series: Established in 1991, these reports review the state of the science on current and emerging issues in tobacco control.
<http://cancercontrol.cancer.gov/brp/tcrb/monographs/index.html>

Smokefree.gov Initiative: Web and mobile tools that give free, evidence-based smoking cessation information and on-demand support to smokers who want to quit.
<http://smokefree.gov>

Clearing the Air: Quit Smoking Today:

This booklet can help people reach their final goal of living a smokefree life. It is designed to support cessation at any stage of a quitter's journey whether they are still thinking about quitting, have made the decision to quit, or have already taken steps to quit and just need help maintaining their new lifestyle.

Funding Opportunities

BRP provides funding support for a comprehensive program of research ranging from basic behavioral research to the development, testing, and dissemination of interventions in areas including tobacco use, screening, dietary behavior, sun protection, emotion regulation, and physical activity, among others. In addition to supporting investigator-initiated research grants, BRP sponsors or co-sponsors a variety of targeted funding opportunity announcements (FOAs). BRP also offers grantsmanship resources to individual investigators from the pre-submission phase through the grant close-out.
