

**Presentation Title:** Developing Models of Care for Adult Cancer Survivors

**Author:** Linda A. Jacobs, R.N., Ph.D., Abramson Cancer Center

**Description:**

Adult Cancer Survivorship

Nearly 10 million cancer survivors in U.S.<sup>1</sup>

- 3–4% of entire U.S. population

- 14% of cancer survivors diagnosed  $\geq$  20 years ago<sup>2</sup>

- For adults diagnosed with cancer, 5-year survival 60%<sup>2</sup>

- Adult cancer survivors at risk for late effects of treatment<sup>3</sup>

Models of Care: Examples

- Primary vs. oncology provider
- General oncology vs. separate survivorship
- General vs. disease or treatment specific
- Consultative model vs. practice model

**Grant Number and Funding Source:** Funding provided by the Lance Armstrong Foundation
