

ResearchtoReality.cancer.gov is an online community of practice designed to create a dialogue between cancer control practitioners and researchers on how to move evidence-based programs into practice.

Developed and supported by the National Cancer Institute (NCI), this community is both an information resource and a forum where community members can connect and collaborate with other public health professionals. Members can ask questions, discuss ideas and solutions, and share useful resources and tools. They can also participate in cyber-seminars and follow practitioners' stories through the Mentorship Program.

Get
Connected

Through Research to Reality (R2R), you can engage with your colleagues and share experiences in a way that facilitates the development of partnerships and strengthens connections and interactions among individuals and organizations involved in cancer control and prevention.

Stay
Involved

Stay involved with R2R and take advantage of the interactive features that will make Research to Reality your "go to" place for information on emerging issues and hot topics in evidence-based cancer control practice.

- Discussion forums
- Events calendar
- Featured partners
- Community member profiles
- Mentorship program

The NCI Research to Reality Mentorship Program

The NCI Research to Reality (R2R) Mentorship Program

is a pilot program with the purpose to help build the capacity of cancer control practitioners to effectively navigate the complex, “real world” context in which evidence-based decision making occurs. Six mentees were matched with experienced public health professionals to work on a year-long cancer control and prevention project relevant to their current jobs. Through the program, mentees will learn and apply the skills and knowledge of evidence-based public health.

Meet the 2011 NCI Research to Reality Mentorship Pairs

Mentee	Mentor	Project Topic
Charlene Cariou, BS, CHES St. Luke's Mountain State Tumor Institute (ID)	Hope Krebill, RN, BSN, MSW Midwest Cancer Alliance (KS)	Sun safety education and skin cancer screening in rural Idaho
Michael Celestin Jr., MA, CHES Louisiana State University Health Sciences Center (LA)	Alton Hart Jr., MD, MPH Virginia Commonwealth University (VA)	Public Health Service (PHS) tobacco guidelines and urology physicians and patients
Kiameesha Evans, MPH Cancer Institute of New Jersey (NJ)	Evelyn Gonzalez, MA Fox Chase Cancer Center (PA)	Nutrition and physical activity program, Body & Soul, in New Jersey area churches
Venice Haynes, MSPH Morehouse School of Medicine (GA)	Cam Escoffery, PhD, MPH, CHES Rollins School of Public Health (GA)	Cervical cancer program, “With Love We Learn,” for faith-based organizations in urban Georgia
Angela McFall, MS Michigan Department of Community Health (MI)	June Ryan, MPA Nebraska Department of Health and Human Services (NE)	Client reminder program for colorectal cancer screening in Michigan
Lisa Troyer, BA Montana Department of Public Health & Human Services (MT)	Eugene Lengerich, VMD, MPH Penn State University, Hershey Cancer Center (PA)	Colorectal cancer screening and integrated messaging program to the insured population in rural Montana
